BACKGROUND OF THE INVENTION

[0001] The purpose of this invention is to provide a storage trunk compartment for truck type vehicles that is very similar to a car type vehicle storage trunk compartment so that item's such as luggage, camping gear, groceries and other similar sized items can be transported in a watertight storage compartment, while allowing the storage trunk compartment to be easily removed so that the full truck bed can be used when so desired.

[0002] This invention takes a distinct advantage that cars have over trucks and brings that advantage to a truck, thereby increasing the utility of a truck as compared to a car type vehicle.

BRIEF SUMMARY OF THE INVENTION

[0003] A truck bed mounted storage trunk compartment with dual locked trunk lids that are accessible from either side of the truck. The truck storage trunk shall be constructed from 10 gauge aluminum tread plate. The truck storage trunk shall include a solar cell that charges a battery. The battery is used to power a switch operated light that is internal to the truck storage trunk. The truck storage trunk can be used to store items such as luggage, camping gear, golf clubs, groceries, etc. as would be stored in a car trunk, while providing tool storage areas, too.

BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWINGS

[0004] The accompanying drawings describe the physical appearance and give typical dimensions for a truck storage trunk. As-built dimensions of the truck storage trunk will vary according to the different sizes of truck beds.

[0005] FIGURE No.1 shows a Front View of the truck storage trunk.

[0006] FIGURE No.2 shows a Side View of the truck storage trunk.

[0007] FIGURE No.3 shows a Top View of the truck storage trunk.

[0008] FIGURE No.4 shows a 3-Dimension Perspective View of the truck storage trunk.

[0009] FIGURE No.5 shows a Shaded 3-Dimension Perspective View of the truck storage trunk.

DETAILED DESCRIPTION OF THE INVENTION

[0010] Referring to FIGURE Nos.1 and 2, the truck storage trunk's structure (1) shall be comprised of 10 gauge aluminum tread plate.

[0011] Referring to FIGURE No. 2, the formed trunk lid (2) shall be comprised of 10 gauge aluminum tread plate.

[0012] Referring to FIGURE Nos. 1 and 2, there are quantity 4 swivel lift handles (5).

[0013] Referring to FIGURE Nos. 1 and 2, there are quantity 2 locks (4).

[0014] Referring to FIGURE Nos. 1 and 2, there is quantity 1 solar cell(6).

[0015] Referring to FIGURE No. 2, there are quantity 2 trunk lid lock latches (7).

[0016] Referring to FIGURE No. 1, there is a center partition (3).

[0017] Referring to FIGURE No. 3, there are quantity 4 trunk lifting mechanisms (8).
